1 Introduction

This exemplary document serves as a guideline for both the outline and format of your work. In this section, you introduce the topic. The research problem should be derived from real-world situations and research to show awareness of the issue. Therefore, you should present the business problem, the scientific problem, the paper's objectives, and the expected contributions. A good guideline on the content and structure of a research paper is provided by Venkatesh (2011, pp. 46–54) Tanenbaum & Steen (2007). In the following chapter, the citation style for your thesis will be explained and presented. Here comes a change

1.1 Objectives of the Thesis

In order to create a common understanding of the research project described in your thesis, it is important to highlight the objectives of this thesis. The formulation of research questions is helpful to conclude the objectives in a concrete manner.

1.2 Structure of the Thesis

The explanation of the structure of your thesis helps a reader to follow your concept and offers a rough overview of the chapters of your thesis.

2 Theoretical Foundation

If your work is based on other scientific theories and models, it is important to outline their structure and results. Use illustrations of models and theories as demonstrated below in Figure 1

Figure 1: A picture of the universe!

In addition to figures, one of the most powerful ways to present information in a coherent way is to create tables as shown in 1. Make sure to include an empty line above tables and figures.

Table 1: Your caption.

Multiple ways of presenting information can be chosen, e.g.

- figures,
- tables,
- ordered lists,
- and enumerations like this one. Here, items can be single sentences or full paragraphs. Appropriate end punctuation should be included.

Appendix

First class of appendices

.1 Some appendix

Appendices contain any further information, which is noteworthy but not necessarily needed to describe in the main part of your thesis. Often complex tables and figures created during your research project will be presented in an Appendix
