1 Introduction

This exemplary document serves as a guideline for both the outline and format of your work. In this section, you introduce the topic. The research problem should be derived from real-world situations and research to show awareness of the issue. Therefore, you should present the business problem, the scientific problem, the paper's objectives, and the expected contributions. A good guideline on the content and structure of a research paper is provided by Venkatesh (2011, pp. 46–54) [1]. In the following chapter, the citation style for your thesis will be explained and presented.

1.1 Objectives of the Thesis

In order to create a common understanding of the research project described in your thesis, it is important to highlight the objectives of this thesis. The formulation of research questions is helpful to conclude the objectives in a concrete manner.

1.2 Structure of the Thesis

The explanation of the structure of your thesis helps a reader to follow your concept and offers a rough overview of the chapters of your thesis.

2 Implementation

We generally recommend the following directory structure for a software project:

- projektname
 - bin
 - doc
 - lib
 - src

The software should be saved in the package `de.uni-mannheim.informatik.swt.projektname` under `src`.

The source code should be entirely in English, including comments, names of functions, variables, menu items in the user interface, short explanations and program output.

The code should be formatted and emitted in the **Courier New** font, as in the following example:

```
package de.uni-mannheim.informatik.swt.projektname;

import javax.servlet.http.HttpServletRequest;

5 import de.unimannheim.wifo3.cobana.action.ActionForm;
import de.unimannheim.wifo3.cobana.action.ActionMapping;

public class GuestbookForm extends ActionForm {
    private String name = null;
10    private String message = null;

    public GuestbookForm() {
    }

15    public String getName() {
        return this.name;
    }
}
```

```
    }  
    public void setName(String name) {  
        this.name = name;  
20    }  
  
    public String getMessage() {  
        return this.message;  
    }  
25    public void setMessage(String message) {  
        this.message = message;  
    }  
  
    public void reset(ActionMapping mapping, HttpServletRequest request  
30    ) {  
        setName(null);  
        setMessage(null);  
    }  
}
```

Appendix

First class of appendices

.1 Some appendix

Appendices contain any further information, which is noteworthy but not necessarily needed to describe in the main part of your thesis. Often complex tables and figures created during your research project will be presented in an Appendix
